How to Obtain Power BI Desktop

There are three ways to get Power BI Desktop. Please note that you should request a Power BI Pro license if you do not already have one. (see the 'Access' section of the <u>Power BI page</u> for more information on requesting a license)

Option One: Once a license has been granted, the application can be downloaded from the WashU Office 365 center.

- 1. Go to the Office365 portal and log in if necessary.
- 2. Once logged in, click on the app launcher menu in the upper left corner and click on Power BI to download.

Option Two:

- 1. In Windows, click inside of the Windows search bar at the bottom of your screen and type in "store" to locate the Microsoft Store app.
- 2. Open Microsoft Store and search for Power BI Desktop, then click on 'Get' to download the application.

Best match			-
Microsoft Store		-	
Settings		Microsoft Store	
Ø	Change where you store offline maps	>	
	Find and fix problems with Windows Store Apps	>	C ² Open BB Apps
D	Storage settings	>	Gaming
Ð	Storage usage on other drives	>	D Entertainment

Option Three:

- 1. Log into Power BI As-a-service.
- 2. Click on the Download icon in the upper right corner and select Power BI Desktop from the menu that appears.
- 3. This will open the Power BI download page in Microsoft Store. Click the Download button to download Power BI Desktop.
